

Health care and dental treatment centre

The medical hub offers services in about 10 different areas of specialisation. It treats elite athletes and external patients, with appointments available between 9am and 12pm and 2pm and 6pm from Monday to Friday. The variety of specialities available means patients are able to access a wide range of treatment within the same establishment. The centre operates within an agreement signed between INSEP and the Greater Paris region's local health insurance fund (CPAM). Appointments can be made to see the various specialists. The centre also offers cutting-edge medical imaging services (radiology, ultrasound, MRI and bone densitometry), which became an economic interest grouping (EIG) in April 2018, and physiotherapy services for post-trauma treatment.

PHYSIOTHERAPY UNIT

The work of the physiotherapy unit is split into treatment (rehabilitation) and accident prevention (preparation and recuperation from training and musculoskeletal reports). The unit is primarily reserved for elite athletes.
