The entire sport service offering and high performance solutions provided by sports federations and the Grand INSEP network centres are displayed thanks to this digital platform.

The main goal of this mapping is to meet the specific needs of elite athletes, staffs and sport federations, by providing a custom-made accompaniment in their performance project.

The mapping allows to :

- Assess precisely, through a national photography, each and every professional sport collaborator ;
- Present an updated offer of available services for sport federations and the Grand INSEP network centres ;
- Enhance specific resources and expertises available for elite athletes and staffs ;
- Guarantee the continuous improvement and upgrading skills of sport's professional collaborators ;
- Analyze the interactions and connexions between sport's collaborators, in order to identify the key individuals of the Grand INSEP network.

Beyond this cartographic tool , the analysis of this digital database plays an active part in the animation and steering of the Grand INSEP network centres.

Mapping every identified professional sport collaborator will allow INSEP, the Grand INSEP network and sport federations to propose a specific accompaniment for every elite athletes aiming to perform at of the Olympic and Paralympic Games of
