

Performance services offerings

INSEP and the RGI are deploying an interactive platform entitled "Performance services offer of the Grand INSEP network". This platform is intended to be a catalogue listing all the sports facilities, infrastructures and performance services of the network's centres.

Several challenges are inherent in this platform: to be able to identify the facilities and services available, to make them legible and accessible, and thus to enhance the service offer of the large INSEP network. The objective is to be able to welcome high-level athletes from all French delegations, to meet their specific needs and to support them, but also to welcome foreign delegations in view of Paris 2024.

This tool therefore provides an accurate and up-to-date picture of the completeness and complementarity of the Grand INSEP network's offer, at the service of top-level athletes and their coaches.
