RECHERCHE

In search of performance

For the sixth consecutive year, the INSEP's Sport, Expertise and Performance Laboratory (EA7370) is organising a series of conferences entitled "In Search of Performance".

📅 ADD TO THE CALENDAR

The objective of these conferences is to discuss the latest scientific advances in the service of sports performance. We invite you to the next event on Thursday, **June 2, 2022, at INSEP**.

This third conference, entitled "**Partnership research for sports performance**", will be an opportunity to discuss recent projects carried out with academic research and private companies with various scientific and field experts. The aim will be to highlight the benefits of partnership research and to discuss the challenges of these new forms of collaboration in order to support French sport in its quest for innovation, both scientifically and technologically, ever faster, ever higher and ever stronger.

The contribution of the CIFRE thesis will be highlighted as a tool at the heart of the scientific support of sports performance through the testimony of scientists, federal and industrial partners.

This conference is aimed at coaches and technical managers, athletes, researchers, students and trainees in sports-related professions, medical and paramedical professions and anyone interested in this topic.

This event will take place in the **Pierre de Coubertin amphitheatre at INSEP** (11, avenue du Tremblay, 75012 Paris). It will also be broadcast live on the INSEP TV YouTube channel.

The reception will take place from 1.30 pm. Depending on the speakers, some presentations will be in English.

Free admission with prior registration **at [the following link...](#)**
