

KONICA MINOLTA, first patron of INSEP

Within the framework of its patronage programme, INSEP wished to make the modernisation of its systems and its equipments of security of its site a priority and thus signed a patronage agreement with Konica Minolta, a printing system manufacturer, specialized in the supply and integration of professional digital printing solutions, document management, videosolutions and IT infrastructures management.

Published on 1 August 2022

INSEP continues to invest in state-of-the-art and high performance infrastructures, particularly in the light of the Paris 2024 Olympic and Paralympic Games. One of the major actions made possible by this first patronage agreement will be the installation of a CCTV system to protect the athletes, the teams and the staffs as well as the buildings and the outdoor areas. The INSEP's staff will be provided with an effective transfer of skills for an optimal use.

Innovation has always been one of the cornerstones of INSEP. Since its creation, the institute has offered the most cutting edge infrastructures to support the performance of the French Olympic and Paralympic Teams and the success of France in sport. Through an innovative and highly technological securization system, we will provide the best security conditions to the athletes, foreign teams and delegations etc. hosted on INSEP's site. In this respect, Konica Minolta's know-how and expertise are fully in line with the challenges that we will be facing in 2024

Fabien Canu, Director-General
